

Filó Project: Building Cladograms

Answer sheet usage instructions:

1. The corner symbols are used for recognition. They must be well printed. If the print fails, just fix it with a black pen.
2. The first row represents the characters (1 to 10). A blank circle means zero; a filled circle means one.
3. The first column represents the taxa. A filled circle activates the taxon.
4. Once completed, simply go to the link and upload the photo. The photo can be taken beforehand or directly through the link.
5. To save paper, you can laminate the answer sheet and fill it out using a whiteboard marker!
